Our Statement

At Agrizone Agricultural Services and Consultancy, what we value most is the positive and lasting impact our work brings to the communities and clients we serve across Somaliland, Somalia and the wider Horn of Africa. Every engagement deepens our connection to the people, the environment, and the unique local contexts where we operate. We believe our role goes far beyond simply delivering technical solutions — it is about contributing to meaningful progress that transforms lives. Whether working with our clients, their teams, local service providers, or end beneficiaries, we are guided by a shared commitment to creating sustainable value through every project we undertake.

This commitment reminds us that our services matter — not only in addressing immediate challenges but also in building stronger, more resilient communities capable of adapting and thriving in the face of change. At Agrizone, impact is not an outcome; it is the purpose that drives everything we do

About the Company

Agrizone Agricultural Services and Consultancy is a leading force in transforming modern agriculture and food systems across Somaliland, Somalia, and the Horn of Africa. Agrizone is committed to delivering innovative, climate-smart agricultural solutions that respond to the evolving needs of smallholder farmers, pastoralists, youth, agri-entrepreneurs, and SMEs along the agricultural value chain — from emerging startups to established enterprises.

Agrizone provides end-to-end agricultural services that support every stage of agribusiness development. Our services include input supply (certified seeds, fertilizers, tools), greenhouse installation, climate-resilient technologies, solar power irrigation systems, capacity building, and extension services. Agrizone also offers specialized market systems development, value chain analysis, market assessments, and baseline, midline, and endline evaluations for development projects.

Additionally, we provide farm management solutions, capacity building and training, livestock production support, and policy and advisory services to strengthen agricultural institutions and private sector actors. We combine technical expertise with deep local knowledge to deliver sustainable and impactful solutions that boost productivity, strengthen resilience, and promote inclusive economic growth.

Backed by a highly qualified team of agronomists, engineers, environmental specialists, Climate change specialists, and value chain experts, Agrizone helps clients design and implement financially viable, sustainable, and context-appropriate strategies. Our reputation is built on innovation, reliability, and trusted partnerships with farmers, government institutions, private sector actors, and international development partners.

Legally registered and rapidly expanding, Agrizone has earned a strong reputation as a reliable, responsive, fast-growing agribusiness company and a forward-thinking agribusiness partner. our core focus is on boosting productivity and empowering rural communities to adapt to climate change. We aim to enhance agricultural productivity and develop resilient food systems that secure livelihoods and promote local development.

Our Vision

To become a leading regional agribusiness and development consultancy driving the transformation of agriculture and food systems in Somaliland, Somalia, and beyond — where farming communities are climate-resilient, economically empowered, and actively contributing to sustainable development.

Our Mission

To empower farmers, pastoralists, and Agri-entrepreneurs across Somaliland, Somalia, and the Horn of Africa through climate-smart agriculture, innovative technologies, and practical solutions that enhance productivity, strengthen resilience, and promote inclusive economic growth. Agrizone is committed to delivering high-quality services and technical expertise that create lasting impact, support food security, and build sustainable livelihoods.

Our Core Values

01

Professionalism

We maintain high standards of excellence, accountability, and results-oriented service to exceed expectations.

02

Sustainability

We promote eco-friendly and climate-resilient practices that protect the environment and ensure lasting food security.

03

Integrity

We act with honesty, transparency, and ethics to build trust and credibility with all stakeholders.

04

Community Engagement

We foster inclusive partnerships with farmers, institutions, and local communities for shared and lasting impact.

05

Innovation & Learning

We embrace creativity, technology, and continuous learning to deliver adaptive, forward-thinking agricultural solutions.

Strategic Goals

01

Food Systems Transformation

02

Livestock Production & Pastoral Resilience

05

Research & Evidence Generation

03

Climate-Smart Agriculture & Solutions

04

Farmer Productivity & Rural Livelihoods

Key Objectives

01

Quality Inputs

Supply certified seeds, fertilizers, irrigation tools, and climate-smart technologies tailored to farmers' and pastoralists' needs.

02

Farmer Capacity

Provide practical training through GAP, FFS, and IPM to enhance farm performance and sustainability.

03

Livestock Production

Improve animal health and productivity through veterinary support, better feed, and technical assistance.

04

Research & Assessments

Conduct market, value chain, and resource studies to guide evidence-based planning and investment.

05

Climate Resilience

Integrate eco-friendly solutions that promote adaptation, mitigation, and sustainable resource use.

06

Market Systems

Enhance access to markets, finance, and agribusiness opportunities for farmers and SMEs.

07

Strategic Partnerships

Collaborate with NGOs, government, private sector, and communities to scale impact and sustainability.

08

Innovation & Technology

Leverage digital tools and modern farming technologies to boost productivity and efficiency.

— Our Strategy

Our Approach

At Agrizone Agricultural Services and Consultancy, we believe that lasting impact in agriculture goes beyond supplying inputs or technologies — it requires a holistic, inclusive, and locally based approach. Our work is shaped by three key pillars: climate resilience, community empowerment, and evidence-based solutions.

Our Approach

01 Locally Rooted and Community Centered

02 Climate-Smart and Sustainability Driven

03 Integrated and Systems Oriented

04 Evidence Based And Adaptive

05 Partnership Driven And Innovative
